

Careers in Focus Programme

January Semester 2024-2025

Industry / Career area focused events offering students the chance to develop their awareness of career opportunities and challenges in their field of interest.

Topics for discussion may cover the latest trends in the field, daily challenges and opportunities in the job, updates on recruitment processes and offer a chance to promote your own organisation.

The sessions may comprise a variety of different formats:

- A panel of industry/alumni speakers with Q&A
- Speed networking opportunities between company representatives and students
- Short (5/10 min) prepared talks.

We are really keen to find some panelists/speakers for each of the sessions and would like to invite you to consider the career areas we will be focusing on at each session.

We would be delighted if you were able to provide a representative from your organisation at one or more of the sessions that would fit with the topic of the week. Someone to talk about their day-to-day roles, what it is like in the job and offer advice for students for the future.

The sessions we will be promoting for students will initially include:

My career in Psychology - Options for the future

**Wednesday
15th January 2025
14:00pm - 16:00pm**

Find out from former graduates about their different roles following their Psychology degree and the day-to-day challenges and opportunities on offer in the workplace. Get top tips for planning the next stage of your career.
