

Dr Alan Forster

I am seeking re-election to senate for an additional 3 years. Within my previous period as a senator I have meaningfully attempted to represent the views of the academic staff, conveying concerns that affect our academic practice, the school culture, and wider environment.

I have attained a good working knowledge of senate procedures and processes and have a history of 'speaking out' on substantive issues during senate and associated working forums. It is personally important for me to ensure that fairness, transparency and accountability in senate business is upheld, with decisions being evidence based at all times. I intend to continue in this manner and if re-elected would be happy to hear from you regarding issues that you have.
