

I am asking you to elect me as your Senator for a second term. I have been an employee of Heriot-Watt University since 2011, and a Senator representing EGIS for the last three years.

I am diligent in my Senate-related activities, and I actively contribute to the debates during Senate sessions. For example, I have recently contributed to the lively discussions on the proposed College structure for the University.

I am well positioned to raise matters in Senate which are critical to L&T, Research and Service, as I am a research-active academic member of staff and the representative of EGIS on the Vision management group. My recent appointment as ISBD Director of Institute will give me further insights into what is important to my colleagues. Remaining a Senator will enable me to continue to engage on these issues at a University-level.

I believe that I am both objective and willing to raise issues that matter to staff. I have demonstrated this through my actions as a Senator, as well as my School and University activities.

I hope you will elect me for a second term.
